

Earth and Environmental Science.

An understanding of the Earth's resources and the ability to live sustainably on the planet .

ATAR - BOARD DEVELOPED - CATEGORY A

About the Course

The course provides the foundation knowledge and skills required to study the earth and environmental science. The application of earth and environmental science is essential in addressing current and future environmental issues and challenges. It is also necessary for the use and management of geological resources that are important to Australia's sustainable future. [Find out more here.](#)

What You Will Do

You will study a range of topics including Earth's Resources, Plate Tectonics, Energy Transformations, Human Impacts, Earth's Processes, Hazards, Climate Science, Resource Management. As well as the theoretical component of the course, practical activities and field work are a core component of this course.

Future Opportunities

Apart from the obvious Environmental and Scientific careers, this course would prepare students for careers such as Park Ranger, Councillor, Politician, Designers, Landscaping, Farming and Agriculture, Construction and Mining. All careers now have an environmental and sustainability component.
